That works for me. Tamara may be unavailable, but that's fine – I can let her know what transpired.

Thank you!

Jim

Subject: RE: Moving forward on Flint Hills refinery site.

Hello Kira,

I apologize for the short notice, but if you have time today, I'd like to try to organize a quick discussion on process and what's to come. I anticipate some technical discussion of sulfolane degradation for John's benefit prior to him reviewing anything, and not all our staff are interested in that kind of discussion. I'm available 10am until 1pm Alaska time today, and then again after 3pm (AK time).

I would also like to invite John to participate in a teleconference tomorrow (10am Alaska time) – this is a technical “Degradation Subgroup” meeting where ADEC staff, consultants, and the responsible party get together to review/discuss issues specific to sulfolane degradation. This “subgroup” was formed to better understand how sulfolane degrades (both biologically and abiotically) so that information can be used to inform any cleanup approach. Again, I apologize for the short notice, but this is a regularly-scheduled meeting that's been occurring since October 2012 – tomorrow's meeting will have some presentations that will be opportunistically helpful to John to understand where we are with regards to understanding sulfolane degradation. If it's not possible to attend, meeting notes are recorded and will be available.

Please let me know if you're available today to discuss and I can arrange a teleconference dial-in number – I expect 20 to 30 minutes will be sufficient.

Thank you!

Jim

Hi Jim

Region 10 is very much in support of helping DEC with technical support on the Flint Hills site. Please let us know whether you would like to set up an initial scooping call to discuss Ada and R10 involvement. Kira

Hi Jim:

I have received permission to support you in this request. The EPA Region has one request, that we coordinate everything through them so they have awareness. If you will send the material for review and your instructions directly Kira Lynch, she will forward them on to me.

Subject: Alaska DEC Contacts

Hello Dr. Wilson,

I am glad to hear that you're able to assist ADEC. Below is contact information for Alaska Department of Environmental Conservation staff involved in oversight of the Flint Hills Refinery contaminated site, or involved in understanding sulfolane degradation and/or fate and transport:

Project Manager: Tamara Cardona, Ph.D.

Contaminated Sites Program Manager: Steve Bainbridge, P.E.

Contaminated Sites, Private Sites Program Manager: Bill Janes

Degradation Sub-group leader: Jim Fish

They are cc'd on this email; please include them on your correspondence to me acknowledging EPA's Ada Lab "peer review" role in helping understand the degradation of sulfolane. I understand staff from EPA Region 10 would also like to be involved.

Also, when you're ready, I can forward you some additional project details, including some degradation-related documents to review.

Thank you for your help with this project. I look forward to working with you.

Jim
